

Precast Forms

Endless Precasting Possibilities

- Pallet and Header
- Haunch Corners
- Five Sided Castings
- Headwalls
- Dominator Precast System
- Custom Castings
- Many More Applications

Versatility

Unlimited versatility due to the wide range of accessories, filler widths, and heights. Custom forms and specialty equipment are a common product provided by Precise Forms.

Durability

There is no need to resurface Precise forms as the durable and resilient face sheet will stand the test of time. With proper care and maintenance, customers achieve thousands of castings per set.

Rapid Setting and Stripping

With a wide variety of attached hardware, rapid setting and stripping of Precise forms saves time and money for today's aggressive and competitive Precaster.

Single and Multi-family Housing

Reduce Construction Time

With time having a costly effect on typical construction, a cast in place shell utilizing the Precise Forms aluminum forming system can save several days over typical wood or concrete masonry type construction. Under normal situations, one day is required to set and pour the exterior, interior walls and roof, and a half-day for form removal and job site clean up.

Reduced Labor

Due to fewer materials placed on the job site, clutter will be reduced lowering site clean up time. An experienced wall crew can reduce construction time by several days over masonry and typical construction methods with the Precise Forms all aluminum forming system.

Monolithic Structures

Standard forms may be used when pouring a deck. This requires that the shoring posts and forms be removed and then additional supports be added to support the deck until it cures.

The Precise Deck Form is specially designed to allow the shoring post and a section of support form to remain in place during the curing process, saving labor time and never having an unsupported deck. The post, beam, and deck is designed to offer a wide variety of building alternatives.

Precise Forms Aluminum Concrete Forming Systems

The Concrete Applications are Infinite with Precise Forming Systems

Invest In The Best!

- Reduced Labor Cost
- Reduced Accessory Cost Compared to 24" Systems
- Strong and Durable
- Retains a High Resale Value
- Exceed 2,500 pours with Proper Care
- State-of-the-art Robotics
- 636" of Weld on a 36"x108" Form
- Beautiful Concrete Finish
- Easy to Use - Minimal Training
- Complete Systems and Support
- Full Line of Fillers and Accessories

No Job is Too Complex for Precise Forming Systems

Forming Applications

International Housing

We provide international aluminum forming systems with low material and labor costs for single or multi-level structures that will produce higher construction profits.

Residential Concrete Housing

Our aluminum forming systems combined with Precise Forms Inc's patented EASI-WALL system will produce concrete housing that is low maintenance, energy efficient, and resistant to natural disasters.

Residential Basements and Foundations

Strong, durable aluminum forming equipment combined with proper maintenance allows Precise Forms users to consistently exceed 2,500 pours while retaining a high resale value .

Commercial

Hand Set, Gang Form, Eliminator, Dominator equipment built to meet the rigors and labor savings needed for today's commercial construction needs.

Precast

Fastest hand set system available to the precast industry, with numerous custom designed parts that make the system highly flexible, economical, labor efficient and profitable. Precise Forms has been an active member of NPCA since 1993.

Fence Forms

The Precise Forms Fence Forming System is the ultimate solution to creating cast in place concrete fences. A full footing is not required for some applications with the Precise Fence Forms. Simply pour footings where the columns are located and tie the rebar into place.

Pools and Spas

Our aluminum forming systems provide an endless variety of concrete and vinyl liner swimming pools. A wide variety of steps, benches, and swim outs are available in both straight and curved designs.

Window Manufacturing

Precise Forms is the only aluminum forming manufacturer to have a state of the art facility dedicated to produce energy star rated windows for basement construction. The Precise basement window system can be used with aluminum systems, plywood forms, and adaptable to masonry walls.

For a complete listing of our products and their applications please download our catalog at www.preciseforms.com or ask for a thumb drive.

Simply Egress Solutions™

State-of-the-art Production Facility

Simply Egress Solutions is a state-of-the-art vinyl basement window production facility specializing in both Cast in Place Windows as well as Cavity Windows. Experienced craftsmen, automated equipment, and quality materials allow us to achieve extremely high efficiency, which saves you money and provides the highest quality vinyl basement window possible. Simply Egress Solutions is a division of Precise Forms, Inc.

Variety of Styles Available

- Double Glazed Slider
- Double Glazed Egress Slider
- Double Glazed Hopper
- Single Glazed Slider
- Cast in Place Window
- Snap in Place Window
- Available in White or Almond

Complete Window Accessories

- Window Bucks
- Window Wells
- Window Well Grates
- Window Well Ladders
- Window Well Anchors
- Plastic Plugs

SES Cast in Place Vinyl Basement Window

Cast In Place Window

- Ready to pour vinyl window
- No reusable pouring buck required
- Both sashes removable and replaceable
- Available in clear glass and Low E
- Cast in place for new construction
- CIP Windows can be used with wood or aluminum forming systems
- Cast in Place Bucks come with glass sash protected by packing and plywood brace
- Versatile tie slots and lifting pockets built into plywood brace
- Removable plywood bracing
- Durable PVC welded frames, chambered for strength and rigidity
- Durable metal locking system
- Aluminum half screen white
- Insulated weather stripping
- Brass sash rollers
- Weep holes
- Proudly made in the U.S.A.

Cast in Place Bucks come with glass sash protected by packing and plywood brace.
